REMARKS UNDER 37 C.F.R. 1.111

Reconsideration and allowance are respectfully requested.

Applicant appreciates the allowance of claims 4-7 and 9-11. The amendment proposed in this Response simply cancels the rejected claims (1-3 and 8) and places allowable claim 9 in independent form. No new matter has been added. Entry and allowance are requested.

Since Applicant has presented a novel, unique and nonobvious invention, and since this amendment places the case in condition for allowance, reconsideration and early allowance are respectfully requested.

Respectfully,

James C. Wray, Reg. No. 22,693

Meera P. Narasimhan, Reg. No. 40,252

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Claims:

Kindly cancel claim 1, 2, 3, and 8 without prejudice.

Kindly amend claim 9 as follows:

9. (Amended) [The method of claim 8, further comprising,]

A method for combining incoming digitized voice packets into

longer frames, comprising:

receiving incoming voice and data signals;

compressing the incoming voice signals to digitized data packets when the incoming voice signals are uncompressed;

packaging the compressed digitized voice packets into a
format compatible with web protocols;

bridging the incoming data signals to digitized data packets when the incoming digitized data signals are compressed;

packaging the bridged digitized data packets into a format
compatible with web protocols;

combining the formatted digitized data packets into first
long frames;

transmitting the first long frames over a data network,
receiving the first long frames in a central node switch;
disassembling the formatted data packets from the first long
frames;

assembling the disassembled data packets into second long frames; and

transmitting the second long frames to switches.
